

To Whom It May Concern -

RE: PROFESSIONAL REFERENCE FOR PHILIP WIK

For a short time prior to a recent shift in client budgetary winds, it has been my pleasure to have Philip Wik on my Project Team.

The Team charge has been to exercise a strict methodology - Andersen Consulting's Method One, in this case - to ensure client deliverables in a Year2000 Testing/Verification/Validation Setting.

Following charter of a specific Test Approach, the project has involved generation of Scenarios, Cases and Scripts. Client Standards have allowed us the flexibility of picking and choosing from Method One those processes and documents most relevant to specific client needs.

In the pursuit of the preceding, Philip Wik has ...

- worked tirelessly in comprehensively assembling relevant technical material
- created/crafted meaningful, contributive system tasks for lesser-experienced Team Members
- set a brisk leading pace for the Team
- displayed razor-sharp focus on all aspects of the task at-hand
- shown initiative and drive far above and beyond the call

Should he want it - he is assured a place on any future skillset-matching team of mine.

I would recommend Philip for any lead, team or solo position of significance requiring an adaptive, seasoned, professional technician with the ability to react accurately on the fly and ensure timely delivery of complete Client expectations.

Yours most sincerely,

Nick Bronzan
