

September, 1999

To whom it may concern:

I have enjoyed the privilege of working with Phil Wik at NDC in the Intellect Corporate Data Warehouse Department at NDC. As a Lead Programmer Analyst, Phil has had performed with great professionalism in managing the accurate and timely installation of Intellect Suite system products. These products involved an understanding of PL/SQL, UNIX, and COBOL and an in-depth understanding of the health care industry.

As a manager, Phil oversaw the day-to-day activities of application developers over the full life cycle of the many projects under his ownership. These projects were installed accurately and on time and within budget.

I would gladly give Phil my strongest reference. He would definitely be an asset to any organization requiring effective management and solid computer skills.

Sincerely,

Gilbert Padilla
